AEIS Executive Artifact: Financial-ESG Reconciliation Delta Report

Module: Episode 0.0: The Accounts Payable Nexus

Objective: To identify and quantify discrepancies between Financial (AP) records and ESG (Carbon) impact through the "3-Way Match" protocol.

1. Executive Summary

To be completed by the ESG Controller.

Metric	Value	Status
Reporting Period	[Quarter/Year]	-
Total Invoices Processed	[Count]	-
Identified Financial Delta ($)	$[Value]	[🔴/🟡/🟢]
Identified Carbon Delta (tCO2e)	[Value]	[🔴/🟡/🟢]
Variance Accuracy Rate	[%]	-

2. The 3-Way Match Audit Trail

Use this section to document specific discrepancies found at the Accounts Payable (AP) level.

Case Study Reference: Project Espresso Discrepancy

Field	AP Ledger (Financial)	ESG Pipeline (Impact)	Delta (Variance)
Document ID	INV-VN-5042	INV-VN-5042	-

Item Description	50kg Urea Fertilizer	50kg Urea Fertilizer	-
Currency Basis	VND	USD	**$0.02** (Conversion Drift)
Emission Factor	N/A	5.15 kg CO2e/kg	**-12%** (Synthetic Infill)

Forensic Finding: The $0.02 financial variance triggered a manual re-extraction of the source PDF, revealing the original receipt indicated *Organic* fertilizer rather than *Urea*.

- **Financial Impact:** Corrected pricing structure.
- **ESG Impact:** 12% reduction in Scope 3 emissions for this specific SKU.

3. Leading Indicators (Daemon Health)

Measuring the integrity of the data source before it reaches the dashboard.

- **Session Collapse Rate:** [X]% (Decrease in time spent on data entry suggests automation fatigue or shadow-infilling).
- **Language of Abandonment:** [Count] of comments indicating "System does not remember our agreement."
- **Shadow Channel Migration:** Estimated volume of Scope 3 data residing in unsanctioned personal LLMs/OCR tools.

4. Remediation Protocol (Seil vs. Bolvangar)

Based on the identified deltas, select the appropriate governance action.

[ ] SEIL (Restorative Persistence)

- **Action:** Maintain relationship; implement corrected OCR validation gate.
- **Goal:** Exit readiness within 6 months.

[ ] BOLVANGAR (Structural Severance)

- **Action:** Immediate termination of procurement.
- **Rationale:** Malicious data tampering / Unverifiable provenance ladder.

5. Formal Declaration & Signature

This section enforces the "Right to Refuse" (Policy 16.4).

ESG Controller Signature: _____

Date: _____

[ ] SIGNATURE WITHHELD: I cannot attest to the accuracy of Section [X] due to a failure in the Data Lineage Validation Protocol (Code: DL-FAIL). Verification velocity mismatch detected: Human review time was < 11.5 seconds per item.
